

DOCUMENT CONTROL IDENTIFIER: NAV-DEF-2026-X89

ORIGINATING AUTHORITY: NAVAL CYBER & DEFENSE COMMAND

SUBJECT: STRATEGIC PROTOCOL FOR OFFSHORE QUANTUM-RESILIENT COMM LINK

CLEARANCE LEVEL REQUIRED: LEVEL 5 (DIRECTORATE SIGN-OFF ONLY)

OPERATION TRIDENT SHIELD

Technical Specification & Cryptographic Deployment Parameters

1. MISSION DIRECTIVE & AIR-GAPPED GOVERNANCE

This classified operational brief establishes mandatory parameters for mission fleet deployment across the Indian Ocean littoral zone. Under strict air-gapped guidelines, all cryptographic keys and command documents distributed to tactical operational units must maintain immutable provenance and individual accountability to ensure full traceability in the event of an operational leak.

2. POST-QUANTUM DEFENSE REVENUE & MANDATE

In accordance with NIST FIPS 203 (ML-KEM-768) and FIPS 204 (ML-DSA-65), all multi-recipient payload distributions must utilize envelope encryption. Under no circumstances may raw session keys be shared between vessel nodes NAVY-0231, AIR-WING-0104, and HQ-COMMAND-0001.

NODE IDENTIFIER	SECTOR / VESSEL	PQC KEY ALGORITHM	STATUS
NAVY-0231	INS Vikramaditya (Flagship)	ML-KEM-768 / ML-DSA-65	ACTIVE / ENROLLED
NAVY-0489	INS Kolkata (Destroyer)	ML-KEM-768 / ML-DSA-65	ACTIVE / ENROLLED
NAVY-0712	Submarine Command Alpha	ML-KEM-768 / ML-DSA-65	STANDBY / VERIFIED
AIR-0104	Maritime Reconnaissance 312	ML-KEM-768 / ML-DSA-65	ACTIVE / ENROLLED

WARNING: FORENSIC ATTRIBUTION ACTIVE.

Every authorized decryption of this document generates a cryptographically bound forensic watermark and signs the session via recipient private key into the immutable ledger. Unauthorized dissemination will result in court-martial under Defense Security Act Section 4-A.
